Degree of Nondensifiability and Applications

Mouffak Benchohra

Laboratory of Mathematics, Djillali Liabes University, Sidi Bel Abbes

Abstract

In this talk we introduce the notion of degree of nondensifiability and its relationship with the measure of noncompactness. Some applications to the fixed point theory and the study of initial and boundary value problems for differential equations are presented.

Mathematics Subject Classification : 34A37, 45M10, 47H10.

keywords : Degree of nondensifiability, measure of noncompactness, fixed point, topological space, space-filling curves, continuum, alpha-dense curves.
